Advanced Magic

The complete spellcasting system for Rath RPG.

How Magic Works

Casters learn **Circles** as **Aptitudes** (Circle of Magic). Each Circle provides themed magical effects.

Spells must be **equipped** to **inventory slots** to use. Each spell takes one slot. Equip same spell multiple times to cast repeatedly. Change spells during **long rest** or between sessions.

Casting a spell makes it **Burnt**—can't cast again until long rest (or short rest to unburn one spell). Burnt spells stay in inventory, become unburnt after resting.

Learning Magic

To use this system, you must take the **Circle of Magic** aptitude:

Circle of Magic (Aptitude): Choose a Circle from this book. Equip spells from your known Circles to inventory slots during long rest.

Taking Circle of Magic: You can take Circle of Magic at character creation or when gaining new aptitudes at levels 3, 5, 7, or 9.

Spellbooks as Gateway Items: Finding a spellbook during adventure can serve as narrative justification for learning magic. A character who studies a recovered tome of fire magic has reason to take Circle of Elementalism at their next level-up. The discovery becomes part of their story.

Multiple Circles: Taking Circle of Magic additional times grants access to more Circles. Each Circle expands your spell options.

Casting a Spell

Step	Action
1. Declare effect	Tell GM what you want
2. GM sets DC	Base (12) + enhancements
3. Roll casting test	d20 + INT or WIS vs DC (depends on Circle)
4. Resolve	See result table

Casting Stats

- **INT-based Circles**: Transmutation, Manipulation, Conjuration, Mentalism, Unholy,

Entropy, Artifice, Elementalism, Fate & Dream, Necromancy

- **WIS-based Circles:** Holy, Nature

Casting Results

Roll	What Happens
DC or higher	Success, spell burnt, no HP loss
DC + 10+	Success, KEEP spell (not burnt), no HP loss
Below DC (miss by 1-8)	Success, spell burnt, lose HP = amount missed by
Miss by 9+	Fail, spell burnt, lose HP = amount missed by

Natural 20 always succeeds

Spell Management

- Spells must be equipped to inventory slots (each spell = 1 slot)
- Casting makes spell “Burnt” until long rest
- **Short rest:** Can unburn one spell of your choice
- **Long rest:** Unburn all spells, can change equipped spells

Scaling Your Spells

Base spell = DC 12. Each enhancement = +1 DC.

Enhancement	Effect
+1 Round/Turn/Hour/Day	Duration lasts longer
+1 Target	Affect one more creature/object
+1 Step	More damage (+1d), higher bonus (+1), better effect
×2 Area	Double radius or cube size
+10 ft Range	Reach farther
Bigger Target	Affect larger creatures (+2 DC per size)
Increase Complexity	Affect more complex mechanisms/effects

Example: Stoneflesh (base): +1 AC for 1 round = DC 12 - +1 AC for 3 rounds → DC 14 (+2 duration) - +2 AC for 1 round → DC 13 (+1 step) - +1 AC, 3 rounds, 2 targets → DC 16 (+2 duration, +1 target)

Size Categories

Used for spells, targeting, and enhancements:

Size	Description
Item	Small enough to carry (cat, dagger)
Object	Too big to carry, smaller than person (barrel, door)
Person	Human-sized and above
Warhorse	Horse-sized and above
Elephant	Elephant-sized or bigger

Creating Your Own Spells

Base Level Spells Should Be:

- **Useful** - Clear purpose and application
- **Scalable** - Enhancements for more power
- **Thematic** - Fits Circle's concept

Start Simple:

- Define basic effect at minimum power
- Add duration if needed (1 round combat, 1 turn exploration)
- Specify range (usually 30 ft or touch)
- Note targets/area (usually 1 target or 10 ft)

Example: “I want to summon a demon to help in combat.”

Start smaller at base level:

- **Size:** Imp (item-sized) not demon (person-sized)
- **Duration:** 1 round
- **Number:** 1 creature

Result: Summon Imp - 1 imp obeys for 1 round

Scale up for larger creatures, more imps, or longer duration.

Advanced Casting Options

Rituals

Take extra time to reduce DC. Each additional **round** or **turn** (GM decides): **-1 DC**

Caster can't move or take other actions. May need protection.

Example: Permanent familiar summoning = DC 18. Ritual for 6 turns (1 hour) -> DC 12.

Cooperative Casting

Multiple casters work together on difficult spells, splitting the DC between them.

Requirements: - All know same Circle - Can communicate - All have relevant spell equipped
- One designated primary caster

Mechanics: 1. GM determines total DC 2. Divide DC among casters (round up) 3. Each rolls casting stat vs their portion 4. **All succeed:** Full effect, all spells burn 5. **Some succeed:** Works, failures take HP = amount missed by, primary takes 1d4 HP 6. **All fail:** Spell fails, all take HP = amount missed by

Example: Two casters, DC 17 -> split to DC 9 each. Three casters, DC 20 -> primary takes 8, helpers take 6 each.

Sacrifices

Reduce spell DC through sacrifice—offering something of value to fuel magic. Dangerous and costly.

Attribute Sacrifice (Personal Cost)

Temporarily weaken yourself to power the spell. - Reduce one stat by 1 -> **-2 DC** per point - Affects all tests and derived stats - Recovery: 1 week rest per point - Can sacrifice multiple points, can't reduce below -3

Precious Object Sacrifice (Sentimental Value)

Destroy something personally meaningful. - Treasured keepsake -> **-3 DC** - Irreplaceable item -> **-5 DC** - Defining item (familiar, holy symbol) -> **-7 DC** - Must establish importance through play - Object completely destroyed

Life Sacrifice (Dark Magic)

Sacrifice living creatures. Marks caster as evil. - Item-sized creature -> **-1 DC** - Person-sized creature -> **-3 DC** - Warhorse-sized creature -> **-5 DC** - Elephant-sized creature -> **-7 DC** - Severe narrative consequences - May attract dark powers or authorities

Combining Sacrifices: Multiple types can combine. Example: STR -1 (-2 DC) + destroy treasured sword (-3 DC) = -5 DC total.

Circle Aptitudes

These aptitudes enhance or modify Circle of Magic spellcasting. They require the Circle of Magic aptitude to use.

Taking Circle Aptitudes: At levels 3, 5, 7, and 9, you may choose Circle Aptitudes instead of other Advanced Aptitudes. Ask your GM which options are available in your campaign.

Spellcasting Enhancements

- **Arcane Recovery:** Once/long rest during short rest, unburn up to L spells (maximum 3)
- **Arcane Recall:** Once/long rest, burn a prepared spell to cast any unprepared spell from your circle. Requires normal casting roll
- **Blood Magic:** Your spells always succeed, regardless of roll. You still take backlash damage on failed rolls
- **Careful Ritual:** Ritual: take 2x time for additional -1 DC (stacks with normal)
- **Desperate Channeling:** Once/long rest, cast a burnt spell by taking HP = DC. Spell

auto-succeeds. Can't reduce to 0 HP

- **Distant Spell:** L times/long rest, double spell range without increasing DC
- **Extended Spell:** L times/long rest, double spell duration without increasing DC
- **Familiar:** Small companion $5 + (L \times 2)$ HP. Scouts, fetches, delivers messages. Can absorb spell backlash damage. Dies: resummon next long rest
- **Metamagic:** L times/long rest, cast silently or without gestures
- **Ritual Caster:** Ritual casting: reduce time by one step (rounds → actions, turns → rounds)
- **Spell Sculptor:** Area spells: choose (casting stat) targets to avoid effect
- **Spell Theft:** Once/long rest, enemy casts spell → casting stat DC $12 + \text{spell level}$. Success: learn Circle, cast one spell from it
- **Spell Twister:** Once/long rest, increase one scaling parameter by up to $L/2$ steps (rounded up, maximum 5) without increasing DC
- **Swordspell:** Cast while wielding one-handed weapon
- **Twin Spell:** L times/long rest, spell targeting 1 creature → target 2nd without increasing DC

Battle Magic

- **Arcane Armor:** 1+ unburnt spell: +1 AC. 3+ unburnt: +2 AC
- **Arcane Blast:** Burn spell → $Ld6 + \text{INT}$ damage to near target, or split between targets
- **Arcane Deflection:** Hit by ranged → burn spell as reaction, reduce damage by $Ld6$
- **Arcane Healing:** Burn spell → heal $Ld6 + \text{INT}$ HP to touch, or split between close range targets
- **Counterspell:** See near creature cast → burn spell, casting stat vs their DC to counter. Works on Circle magic and scroll casting. Does not work on Hedge Magic
- **Spell Parry:** Hit by melee → burn spell as reaction, add casting stat to AC. If miss: melee spell attack vs attacker
- **Spell Strike:** Hit with melee → cast spell targeting that enemy as bonus action (burns)

Quick Casting Example

1. “*I cast Conjure Flame to blast that orc!*”
2. GM: “*Base DC 12. Make it stronger?*” Player: “*4d4 damage!*” GM: “*3 extra steps, DC 15*”
3. Player rolls: $d20 + \text{INT} = 18$

4. 18 beats 15 -> spell succeeds, spell burnt, no HP cost

Optional Rules

Wizard Battle

When a caster with the **Counterspell** aptitude successfully counters a spell, they may choose to initiate a **Wizard Battle** - a dramatic magical duel between two Circle mages. If Counterspell is used outside of combat, immediately roll initiative.

Battle Level: The countered spell's DC - 10. This determines the stakes of the duel.

Chartomancers: Scroll casters cannot enter Wizard Battle - they lack the magical reserves to sustain a duel. If a Counterspeller declares Wizard Battle against a Chartomancer, the Chartomancer simply takes (Battle Level)d6 damage immediately. No duel occurs.

During Wizard Battle: - On each caster's turn, they must make an opposed INT test. They may still move, but cannot take any other actions, bonus actions, or reactions - they are fully focused on the duel. - The caster whose turn it is becomes the **Attacker**. The other caster is the **Defender**. - **Attacker wins:** Deal (Battle Level)d6 damage to the Defender. On a tie, Attacker wins. - **Defender wins:** The Defender may choose to **disengage** (ending the Wizard Battle) or continue.

Ending Wizard Battle: - A Defender chooses to disengage after winning their defense (their next turn proceeds normally) - Either caster is incapacitated (if a caster drops to 0 HP but succeeds on their CON test, the battle continues)

Outside Interference: Attacks against casters engaged in Wizard Battle have **disadvantage**. The duel warps the space around them - crackling energy, distorted air, or otherworldly phenomena make them difficult targets. A caster already engaged in Wizard Battle cannot be pulled into another, and third parties cannot join an existing duel.

Flavor: Wizard Battle can be described however fits the moment: streams of opposed energy, casters flying through the air exchanging magical bolts, a battle of wills in a shared mindscape, or raw arcane forces colliding. The key is that both casters are locked in magical combat until one breaks free or falls.
